

Integrated Management System Policy

EL-ENG s.r.o. was established on 3 July 2006 and, throughout its existence, has provided comprehensive services in the energy sector. The Company employs professionals engaged in technical planning, project management and construction execution. It offers solutions ranging from design documentation and engineering services to the implementation of industrial installations, measurement and control systems, as well as subsequent maintenance, servicing and outsourcing services for completed installations. In projects where technology constitutes a substantial part of the works, EL-ENG acts as the general contractor.

The company was founded by workers who participated in the implementation of the most important buildings in the Czech Republic and Slovakia in the field of industrial electrical installations.

In its activities, the company applies and continuously improves the management system in accordance with the requirements of ČSN EN ISO 9001, ČSN EN ISO 14001 and ČSN ISO 45001.

Through the consistent application of the principles of the Integrated Management System by all employees, the Company expects to achieve benefits in various forms, including higher customer satisfaction, reduced operating costs, increased productivity, enhanced employee competence and performance, improved employee satisfaction, and greater management effectiveness.

To achieve these objectives, the following principles are applied:

- All activities must be managed with the objective of delivering services that consistently meet and exceed the stated and anticipated requirements of our customers and other interested parties (including suppliers, employees, and others). The aim is to gain and maintain their confidence, ensure their satisfaction, and strengthen our competitive advantage.
- To identify and fulfil customer requirements and all applicable legal and regulatory obligations.
- To apply the principle of continual improvement to enhance the effectiveness of all processes within the Integrated Management System.
- To prevent defects, accidents, incidents and near misses through a proactive preventive approach and the implementation of corrective actions.
- In order to meet customer requirements and the functionality of the Integrated Management system, ensure the necessary competence of employees, systematically evaluate and subsequently develop it in an effective form of training.
- To ensure that all products, services and work activities comply with occupational health and safety requirements and environmental protection requirements.
